

Applications

Paths and access road reinforcement

Paddock and pasture approaches

Storage areas

Waiting yards

Open stables, feeding areas

Chicken runs and cattle paddocks

Alpine pasture farms

Dog kennels

Compound reinforcement

ECORASTER®
compact, versatile, durable

Experience that pays

ECORASTER® is the product of many years of experience with ground surfaces. Agricultural specialists and civil engineering experts have joined forces to develop and enhance this system, so with ECORASTER®, you can be sure of getting an advanced-technology product tailored to your needs.

Handling and installation

One, two, three!

It's as simple as that to lay ECORASTER® yourself!

Twelve individual sections are preconnected in the factory to form easy-to-install units. This means that you can lay an area of 1.33 m² in one go. Laying them couldn't be easier.

Step 1

Easy to lay

Step 2

Lay out and align the whole row

Step 3

Interlock the sections in the safety locking system

ECORASTER®
ELASTIC

Surface reinforcement
with natural drainage

- ✓ Patented safety locking system
- ✓ Permanent drainage
- ✓ Robust surface with good grip
- ✓ Minimal maintenance

Advantages

- No mud, non-slip
- Minimal risk of injury as the surface is level
- Reduces incidence of claw/h hoof diseases
- Quick and easy to install
- Low maintenance
- You can drive on it (tractor etc.)
- High load capacity up to approx. 150 t/m²
- Weatherproof
- Ammonia-resistant
- Withstands frost and UV radiation
- Environmentally friendly
- Multiple certification under German TÜV quality system

Expertise for every application
ECORASTER® systems: No more mud and muck

Finally! Clean and dry underfoot thanks to Ecoraster®

Without Ecoraster®

With Ecoraster®

ECORASTER® is available in a variety of forms. The properties of the system can be optimally adapted to the individual requirements of your intended application.

The patented safety locking system

The patented safety locking system (patent no. 0576939) holds the individual sections together securely. When laid, the Ecoraster® files interlock tightly to create a solid surface.
